EDUCATION

- **Central University Of Jammu** Jammu & Kashmir, India
Computer Science and Engineering (M.Tech.) July 2024 - Present
- **Rajasthan Technical University** Kota, India
Computer Science and Engineering (B.Tech.) - CGPA: 7.3 Jan 2023

EXPERIENCE

- **ComExpo Cyber Security | Security Analyst** July 2021 - Jan 2022
Penetration Tests: Performed infrastructure and application penetration tests, physical security reviews, and social engineering tests.
Social Engineering: Performed assessments of security awareness training using social engineering.
- **Cyber Crime Cell, Gurugram Police | Cyber Security Intern** June 2021 - July 2021
Studied: Ethical Hacking, Cloud Security, IOT Security, Data Breaches, Email Crimes & investigations, Social Media Crimes & Securities, Crypto Currency & Financial Fraud investigations.
Researched: Dark Web Analysis, Malware Analysis, Steganography.
- **WordPress Developer** Jan 2016 - May 2021
Website Security: Making sure that the site is secure and the architecture on which it is built is up-to-date. Performed malware scans and enabled firewalls to block potential threats.
Content Management: Continuously adding content to the websites like blog posts, photographs and fixing website pages, etc. With the help of HTML and SEO, I optimize the content and tags to reduce the website loading time.
Impact: Endorsed by others with an average rating of 7.65.

SKILLS

- **Programming Languages:** JAVA, Python
- **Ethical Hacking Tools:** Linux, Wireshark, Nmap, Burp Suite, Metasploit, Hydra, Hashcat
- **Soft Skills:** Leadership, Problem-solving, Critical thinking

PROJECTS

- **Password Generator | Link** Java
A tool designed to create strong and randomized passwords for enhanced security. The tool uses a combination of letters, numbers, and special characters to generate unique passwords that are difficult to guess or crack. Users can customize the password length and complexity to meet their specific needs.
- **Smart Home Automation & Security System:** Java (JArduino)
As a part of my college project, I demonstrated the practical implementation of this project by using Arduino, a PIR sensor, a camera with a GSM module for SMS alerts, and an RFID reader and a tag. I created a functional system that was able to detect movements, capture footage, and send SMS alerts in case of any unauthorized access. The RFID reader and tag were integrated into the system to provide an additional layer of security, ensuring that only authorized individuals have access to the system.

CERTIFICATIONS

- Edge Computing - NPTEL & IIT Kharagpur
- Ethical Hacking - NPTEL & IIT Kanpur
- IT Fundamentals for Cybersecurity - IBM & Coursera
- IBM Cybersecurity Analyst Professional Certificate - IBM & Coursera

ACHIEVEMENTS

- Secured a spot in the top 3% on **Try Hack Me**.
